Skateboarding Made Simple Full Download Free Download - Audio & Video Converter.... Aaron Kyro is an excellent professional skateboarder, artist, and the founder of KANKR... 2016-12-28 22:47:03 A: You can just skip to the "tricks". Here's a Youtube video for the basics. Q: A proof for the union of a null collection of compact sets is a compact set? Let (X, τ) be a topological space. Let \mathcal{A} be a collection of subsets of X . Suppose that for every compact set K , $\bigcup_{A \in \mathcal{A}} K$ is compact. Show that \mathcal{A} contains only finite many compact sets. First, let's prove by contradiction. Assume that \mathcal{A} contains infinite many compact sets. Then, there exists a countable subset \mathcal{C} of \mathcal{A} such that $\bigcup_{K \in \mathcal{A}} K = \bigcup_{K \in \mathcal{C}} K$. Since τ is Hausdorff, \mathcal{C} is closed. Also, \mathcal{C} is compact because τ is Hausdorff. Then, I cannot figure out how to conclude. Another attempt: Assume that \mathcal{A} contains infinitely many compact sets. Then, there exists a countable subset \mathcal{D} of \mathcal{A} such that $\bigcup_{K \in \mathcal{A}} K \subseteq \bigcup_{K \in \mathcal{D}} K$. By the same reasoning as the previous attempt, \mathcal{D} is closed and compact. Let K be a compact subset of X . Then, by assumption, $K \cap \mathcal{D}$ is closed and compact. But K is arbitrary, this means that the topological space (X, τ) is not Hausdorff. A: Let K
